Typotherical protein F23F1.6 - Caenorhabditis elegans
C;Species: Caenorhabditis elegans
C;Accession: T32266
R;Wu, X.
submitted to the EMBL Data Library, September 1997
A;Description: The sequence of C. elegans cosmid F23F1.
A;Recernice number: 221142
A;Recernice number: 221142
A;Recession: T32266
A;Status: prealiminary; translated from GB/EMBL/DDBJ
A;Residues: 1-583 - WINX
A;Gene: CESP:F23F1.6

hypothetical protein all3208 [imported] - Nostoc sp. (strain PCC 7120)
C;Species: Nostoc sp. PCC 7120
C;Species: Nostoc sp. strain PCC 7120
C;Date: Nostoco sp. strain PCC 7120
C;Accession: A12206
A;Accession: A12208
C;Superfamily: Synechocystis hypothetical protein s1r1087
C;Superfamily: Synechocystis
A,Title: Genome sequence of the endocellular bacterial symbiont of aphids Buchnera sp. A. A,Reference number: A84930; MUID:20445173; PMID:10993077
A;Reference number: A84963
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-36 <STO>
A;Coss.references: UNIPARC:UPI000005E514; GB:AP000398; GSPDB:GN00144

govulation protein - Clostridium acetobutylicum
C;Species: Of-Jan-1995 #sequence_revision 06-Jan-1995 #text_change 09-Jul-2004
R;Reid, S.J.; Hancock, K.; Santangelo, J.D.; Woods, D.R.
submitted to the EMBL bata Library, March 1992
B;Bestription: Cloning and sequencing of a spoilD gene from Clostridium acetobutylicum.
A;Reference number: S27530
A;Reteus: preliminary
A;Molecule type: DNA
A;Residues: 1-362 cRED.
A;Recosericies: UNIPROT:045833; UNIPARC:UP100000B7749; EMBL:M87835; NID:g144914; PIE
C;Superfamily: stage II sporulation protein D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      probable d-amino acid oxidase - fission yeast (Schizosaccharomyces pombe)
G/Species: Schizosaccharomyces pombe
G/Species: Schizosaccharomyces pombe
G/Species: Schizosaccharomyces pombe
G/Accession: T40989

G191194

BNA helicase RecG [imported] - Escherichia coli (strain O157:H7, substrain RIMD 0509952)

C, Species: Bscherichia coli
C, Date in 18-011-2001 #sequence_revision 18-011-2001 #text_change 09-01-2004

C, Accession: G91194

                                                                                                                                                                                                                                                                                                                  -: FUNCTION: Enhances neurite outgrowth.
-: SUBCELLUIAR LOCATION: Membrane-bound (Potential).
-: SUBCELLUIAR LOCATION: Membrane-bound (Potential).
-: TISSUE SPECIFICITY: In the adult, significant expression is detected only in the brain. Broadly expressed in embryonic brain with highest expression in subventricular zone, subplate, cortical plate, pyramidal cell layer of hippocampus, thalamus and hypothalamus where levels are highest in ventromedial hypothalamus and medial part of periacqueductal gray matter. Also expressed in mantle layer of spinal cord and in lateral and medial motor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DEVELOPMENTAL STAGE: In the embryo, expressed from day 10-12 and continues through later gestational development and into
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Score 42; DB 1; Length 696;
